Berlin, Germany

PROFESSIONAL SUMMARY

Full-stack engineer with three years of paid e-commerce frontend delivery at KPS AG (2022 - 2025), across SAP Commerce Cloud, Spryker, Magnolia CMS and Storybook for major German retail clients: EP, Jungheinrich, NORMA and Dehner. Accessibility-focused, with hands-on WCAG audits and ARIA remediation across multilingual markets. Since 2026 I build web products end to end and the AI systems inside them, solo: a civic-tech app built with a four-subagent Claude Code system (pre-launch), an LLM lead-scoring pipeline, and live client sites in Greece and Sweden. EU citizen, open to roles in Germany, Greece and Switzerland (remote-friendly) and to freelance projects.

CORE COMPETENCIES

Next.js & React

TypeScript

LLM integration (Gemini)

Multi-agent workflows (Claude Code)

Supabase & Postgres

WCAG 2.2 AA accessibility

i18n (DE/EN/EL/SV)

Performance budgets

WORK EXPERIENCE

KPS AG · Berlin, Germany

Sep 2022 - Oct 2025

Frontend Developer

- EP: (May - Sep 2025):** SAP Commerce Cloud (CCV2) shop frontend with a focus on accessibility and performance; full WCAG audits with Accessibility Insights and ARIA, text-spacing and zoom remediation; accessibility localised for German, Swiss French and Swiss Italian markets; dependency upgrades for security.
- Jungheinrich (Nov - Dec 2024):** Expanded a Storybook.js component library with reusable components built from design specs, and reviewed existing components for quality and consistency.
- NORMA (Jul - Sep 2024):** Extended a Spryker webshop frontend with custom, reusable components; refactored styling for responsiveness; visual testing across breakpoints.
- Dehner (Dec 2022 - Mar 2024):** Major Spryker webshop integrated with Magnolia CMS: reusable components, consistent UI between CMS and shop, code reviews and CI/CD with GitHub Actions.

PROJECTS

PawGuard

Since Apr 2026 · in development, pilot pending

Anonymous animal-cruelty reporting app for Greece, built solo with four Claude Code subagents working under written constitutions. A zero-retention relay processes photos and locations in memory and stores seven non-personal columns; row-level security is forced and append-only, asserted by 11 pgTAP tests alongside 20 Vitest and 46 Deno tests.

React Native (Expo) · Supabase (RLS, Edge Functions) · Resend · TypeScript · Vitest · pgTAP

Lead Finder

May - Jun 2026 · deployed, private

Single-user prospecting tool and mini-CRM: about twenty local businesses per search, each scored 0 to 100 with a one-line reason. A placeholder check short-circuits; only real sites get PageSpeed, screenshots and a text read in parallel, and only the visual and content checks call Gemini 2.5 Flash. Deployed on Vercel Pro with 156 unit tests.

Next.js 16 · React 19 · Supabase · Gemini API · Google Places API · Vitest

Aegeon

May - Jul 2026 · live

DE/EN/EL booking-request site for a five-unit sea-view rental in Chalkidiki, built from the owners' design handoffs. Supabase is the single source of truth with an owner-only admin; its own calendar sync pulls the Airbnb and Booking.com feeds every 15 minutes. Launched with a Stripe checkout, then moved to owner-confirmed requests at the owners' request.

Next.js 16 · next-intl · Supabase · Stripe · Resend · Vercel Cron

Ego Distillers Aug - Sep 2026 · live, egodistillers.com

Swedish/English site for a Gothenburg distillery, bar and restaurant, built within a client-set design direction: typed dictionaries, an embedded table-booking calendar, the menu as code and a Resend form on a verified domain.

Next.js 16 · React 19 · Tailwind v4 · Resend · Vercel

Kryotera Sep - Oct 2026 · live, kryotera.gr

Greek-first B2B site for whole-body cryotherapy chambers: direction, design and build. Server-side Greek uppercase and number formatting, CSS-only motion, a three-question model finder and a Resend enquiry form; live since 6 October 2026, with 53 Vitest tests.

Next.js 16 · next-intl · Tailwind v4 · Resend · Vitest

Career Ops Agent May 2026 · personal tool

Customized fork of santifer/career-ops (MIT), an AI job-search system that runs in Claude Code, plus a web dashboard I built from scratch over its markdown files with no database; status changes rewrite one table row atomically through Server Actions.

Next.js 16 · React 19 · Tailwind v4 · Base UI · Recharts

T.E. Learning Center May - Jun 2026 · live

Greek-first marketing site for a private language school in Chalkidiki, written for parents first: a custom design system in CSS custom properties, Greek-subset typography and all copy in one module.

Next.js 14 · React 18 · CSS custom properties · Vercel

Gerler Ltd corporate website Nov 2025 - Jan 2026 · unpaid

Corporate website for a friend's business, designed and built in Webflow: responsive layout, consistent branding and an SEO-friendly structure.

Webflow

EDUCATION

Worcester Polytechnic Institute · Worcester, MA, USA 2015 – 2019

Four years of Computer Science coursework toward a BSc (degree not completed).

SKILLS

- Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3 / SCSS
- Frontend:** React, Next.js (App Router, RSC, Server Actions), Tailwind CSS v4, next-intl, Base UI / shadcn, React Hook Form, Storybook
- Motion:** GSAP (ScrollTrigger, SplitText), Lenis, View Transitions, CSS scroll-driven animation
- Mobile:** React Native (Expo, Expo Router), NativeWind, TanStack Query, Zustand
- AI / LLM:** Claude Code (subagents, skills, hooks), Google Gemini API, multi-agent workflows (constitution-as-code, audit gates), MCP, prompt engineering
- Backend & data:** Supabase (Postgres, Auth, Storage, RLS, Edge Functions), Payload CMS 3, SQL, Stripe, Resend + React Email, Zod
- Tooling:** Vercel, Infisical, GitHub Actions, Docker, Vite, pnpm, Git
- Practice:** WCAG 2.2 AA audits + ARIA, Playwright + axe-core, Vitest, i18n (DE/EN/EL/SV), performance budgets, SAP Commerce · Spryker · Magnolia
- Spoken:** English (fluent) · Greek (native) · German (basic)
